

# End-to-end transformation and innovation experts

Working strategically with government and universities, assisting organisations in modernising their IT architecture, systems, and service delivery

Focused on elevating the student experience and learning journey, we have collaboratively engaged with approx. 80 UK universities, securing substantial grants amounting to millions of pounds, to deploy cloud-based technologies, drive transformative initiatives, and enable innovative solutions.

Our impactful contributions extend to the significant transformation of major national educational services, including the Apprenticeship Service and T levels. With a wealth of expertise in funding, reporting, and secure data services, we ensure comprehensive support within secure environments.

**Methods provides wide-ranging services and thought leadership to support service delivery including:**

# How can we help?

## Subject Matter Experts

Deep domain knowledge and best practice frameworks deliver innovative digital solutions

## Modernisation Programmes

We enhance, modernise, streamline, and simplify all aspects of IT technical architecture, systems, cloud infrastructure, strategy, and operating models

## Self Sufficiency

Ongoing knowledge sharing and upskilling, delivering client self sufficiency

## Cross-Organisational Benefit

We develop user-centric services that can be leveraged across other areas of your organisation

Department for Education

Developed the service vision and strategy for the new T Levels qualification

that put student experience at the forefront of this evolving programme strategy

Part of achieving 'UWE's Strategy 2030' ambition was to enhance services and develop cloud capabilities that focused on infrastructure modernisation, service improvement, and sustainability

creating a seamless and secure experience for students, staff, and external partners, centred on cloud-based systems

Improving agility, cyber protection, and carbon footprint

by creating a modern and secure IT infrastructure capable of delivering a wide range of innovative digital services to students and staff

Enriched student experience by implementing a secure mobile desktop solution across multiple platforms

enabling seamless access to teaching, learning, research, and business applications, and a consistent user experience regardless of when or where access is needed
